

ENVIRON™

press release

SWISS VITAMIN INSTITUTE CERTIFICATION

Environ®'s C-Quence® Serums 1, 2, 3 & 4 are endorsed by the Swiss Vitamin Institute. Founded in 1931, the institute is based in Lausanne and was established to research the different natural vitamin content in men and women to establish the “normal” vitamin content requirements in order to maintain healthy levels in the body whether it be in skin, body functioning, food etc.

Environ submit C-Quence 1, 2, 3, & 4 to the Swiss Vitamin Institute annually to verify that the products contain the claimed vitamin concentration. The consumer gets a quality product manufactured and packaged under stringent conditions to protect the vitamins that are guaranteed to contain the said vitamin content.

The Swiss Vitamin Institute also analysed the vitamins in C-Quence 1, 2, 3, & 4 to assist the company in confirming the stability of the vitamins and therefore the shelf life that assures the customer that they get the best value for money.

Environ products were the first skin care products in South Africa and New Zealand to carry the SVI endorsement and this once again placed Environ at the forefront of the cosmetic industry in providing the most advanced skincare products.

Environ® skin care products are sold through Doctors, Plastic Surgeons, Appearance Medicine Practitioners, Trained Skin Care Therapists, Beauty Therapy Salons and Spas.
