

## The Natures Sway Solutions Range

The Natures Sway Solutions range is comprised of three soft-structured baby carriers, designed to make carrying your baby enjoyable and promote bonding through closeness. The construction of our carriers supports the natural curve of baby's spine, and ensures comfort for both parent and child. We use only natural fabrics as we believe in the best health outcomes for your baby. Anyone can wear our carriers, regardless of size or gender. Each carrier is perfect for different scenarios, providing a range of options for keeping your baby close. They come in a great range of colour and pattern combinations – see the chart on our website.

### Loving

Keep baby close to your heart and safe

### Natural

Cotton or hemp fabric with wool padding

### Ergonomic

Designed to support natural posture

## Natures Sway T.I.C.K.S. Rules for Safe Babywearing

Always keep your baby close and safe when you're wearing a sling or carrier.

- ✓ **T**ight – comfortably close with no slack or loose fabric.
- ✓ **I**n view at all times – your baby's face should be upwards if in the cradle position (Sling) or to the side if on your chest (Pouch Pack & Carry Wrap).
- ✓ **C**lose enough to kiss – you should be able to easily kiss your baby on the head or forehead.
- ✓ **K**eeP chin off the chest – with a space of at least a finger width under your baby's chin.
- ✓ **S**upport the natural curve of your baby's back – check that baby is not slumped and their head is well supported.

Correct positioning is important for safety and comfort. For full instructions on how to use your Natures Sway baby carrier visit: [www.naturesway.co.nz](http://www.naturesway.co.nz).

Natures Sway is a gold member of the Baby Carrier Industry Alliance (BCIA).

## The Natures Sway Story

Natures Sway is a New Zealand based manufacturing company founded by Kate Hornblow in 1993. After unsuccessfully searching for products that met the needs of her own children, Kate created the sleep-enhancing Baby Hammock and the user-friendly Sling. "Back in the 90's it was unusual to wear your baby and I would get stopped in the street to ask where I got my sling. In societies that traditionally carry their babies there is far less incidence of hip dysplasia and you hardly ever hear a baby cry. Baby wearing has been like a lost art in the West but nowadays a lot of people are realising the many benefits of fulfilling their baby's primary need to be carried."

Natures Sway is committed to using natural, premium quality materials and carefully sourced components. New parents can be reassured that care has been taken to adhere to SIDS and TICKS recommendations. All parts are put through stringent quality control checks; resulting in reliable and durable products created with the safety of your loved ones in mind. Enjoyed by discerning parents and satisfied babies in many countries, Natures Sway delivers an excellent 'back to nature' beginning for babies of the 21st century.

*"For millions of years new born babies have been held close to their mothers from the moment of birth. Being held and included in normal activities is the foundation for human well-being. Our positive identity is based on feeling right, good and welcome: as experienced by the infant in arms: their rightful place."*

## Baby Carriers

NEW ZEALAND MADE

## Sling

The Natures Sway Baby Sling uses a 'one click and you're in' system, making it ideal for quick trips where your baby will be in and out of the carrier. It works on the counter-balance so you stand straight even with a large toddler on your hip. Great for small babies and breast-feeding support. The high tech clips and wide contoured shoulder pad make this a modern day take on an age-old way of carrying your baby.

- Suitable for newborns to 2-3 year olds.
- Made from either 100% soft cotton canvas or our 'Organics' 55% hemp and 45% organic cotton fabric.
- Fits adults of all sizes.
- Easily adjustable from the diagonal cradle position for new born babies, through to the hip-seat position for infants who are able to sit.

## Pouch Pack

An exceptionally hardy baby carrier, designed to keep your baby close to your centre of gravity, enabling you to carry even a toddler for long periods of time. The ergonomic design makes the carrier feel like another item of clothing, allowing you to cosy up to baby unhindered.

- Suitable for newborns to 2-3 year olds.
- Made from our 'Organics' 55% hemp and 45% organic cotton fabric.
- Adjustable clips and straps, which make it easy to wear baby on the front, back or side.
- Featuring pure wool padding with extra wide shoulder straps and waist band, contoured for improved performance and weight distribution.
- The specially designed seat of the pouch means small babies are positioned correctly, keeping the weight off their developing hips.

*"I really love it and have used it almost everyday. My son loves it, he's a very active, energetic boy who only keeps still when asleep. When I use the pouch pack, he completely relaxes and becomes placid! It's amazing, he just loves it. I really enjoy carrying him, because of the closeness and snuggles I get. Also, it is so comfortable, I barely feel his weight..."*

Rachael Dravitzki

## Carry Wrap

Made from organic cotton knit, this is the most comfortable carrier of all – it's like wearing a second skin! In the Carry Wrap you can wear your baby upright or diagonally across your chest for hours. Perfect for newborns and premature babies who require extra closeness.

- Suitable for babies from 2 to 10kg.
- The organic knit is stretchy so you can tie it once and put baby in and out 2 or 3 times.
- The woven cotton centre panel provides extra support for baby's back and is also a handy pocket.
- Baby sits in the 'froggy' position with knees above hips, so there is no strain on the developing spine and pelvis.

*"Lirina has been happy in the carry wrap since her very first days in this world. She loves to fall asleep in it when she's tired and just snuggle in it. When she's awake she likes facing out to enjoy everything that happening in front of her. My midwife, post natal nurse and GP all said it's the best designed wrap they've seen so far. I love wearing it and do it every morning, and it's good to have 2-3 so one can be washed..."*

Ella Osnat

*"I bought one of your slings when I had my first child over 3 years ago, he was a reflux / high maintenance little lad and I took him everywhere in the sling from near birth till he was physically too heavy for me to carry around in it anymore, it was a complete life saver. Perfect for the shops where I always have a hand free to hold the other's hand. It's also been great when we go walking off the beaten track, to the beach etc, places the pram can't go..."*
