Financial Reporting

Up-to-date reporting with links to all original transactions

Xero

is a web based accounting package. Xero embraces the power of the internet so you can access your financial data when it suits you and from anywhere in the world. Xero accounting software and your data files are stored on Xero's computer.

Bank transactions are downloaded from your bank into your data file nightly. The software remembers codes used previously for the same transaction and automatically codes them.

Your bank accounts are therefore up to date and there is no searching for missing statements.
